

Green Growth Fund

Sustainable Boost Grant

The Green Growth Fund is an innovative financing initiative designed to promote sustainable economic development and environmental stewardship. This fund offers tailored financial solutions to small businesses that contribute to reducing energy consumption, resource use, and greenhouse gas emissions. Specifically, the Green Growth Fund offers a lower barrier to entry lending product up to \$250,000 to ensure accessibility for underinvested small businesses.

The Sustainable Boost Grant is a unique feature of this fund, providing an additional layer of financial security and flexibility to borrowers. This grant component demonstrates the fund's commitment to supporting sustainable practices while addressing the practical financial challenges that businesses may face. The grant will be made available upon full repayment of the loan.

WHO IT'S FOR

- Entrepreneurs adopting sustainable practices, materials, or energy-efficient upgrades
- Entrepreneurs in green industries – EV charging, energy retrofitting, waste management, and more
